PLAIN WINDSCREENS

PLAIN SCREENS IN MANY COLORS

9 OZ MESH

PLAIN — NO PRINTING

Our 9 oz. unprinted construction mesh is built to withstand the toughest job site conditions. Engineered with a durable PVC-coated weave, it allows high winds to pass through while keeping dust contained and active work zones completely hidden from public view. Ideal for long-term commercial builds, temporary fencing and scaffolding protection.

Finishes 4" shorter than fence height so it can be pulled tight at top and bottom to prevent sagging

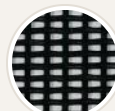

Reinforced, heat-sealed perimeter on all sides with grommets 15" apart

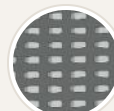

Engineered for approximately 35% airflow — no ripping or tearing

FULL COLOR PRIVACY SCREENS

IN THE FIELD

EDGE-TO-EDGE

Rendering of the new Newark Airport terminal printed across the fence line.

8 OZ MESH

FULL COLOR PRIVACY SCREEN

Make a bold statement across hundreds of feet of chain-link fence. Our 8 oz. full color privacy screen lets general contractors, commercial developers and architecture firms showcase photo-realistic renderings, complex multi-color logos, sponsorship graphics and site safety messaging in vivid, edge-to-edge detail.

Great for community engagement and development

Easily attaches to chain-link fences and gates on construction sites, venues and buildings

Provide your high-quality renderings or vector graphics

CUSTOM SIZES AVAILABLE

BE BOLD & STAND OUT

18 OZ. OVERSIZED VINYL BANNERS

18 OZ BLOCKOUT VINYL

YOUR BANNER, YOUR WAY

18 oz. blockout vinyl banners are our most durable, heavy-duty signage solution, engineered for extreme weather and long-term site installations. A dense, tear-resistant polyester scrim is wrapped in commercial PVC, with an internal blockout layer that eliminates light pass-through — making the banner 100% opaque for vibrant single- or double-sided printing.

GUIDELINES

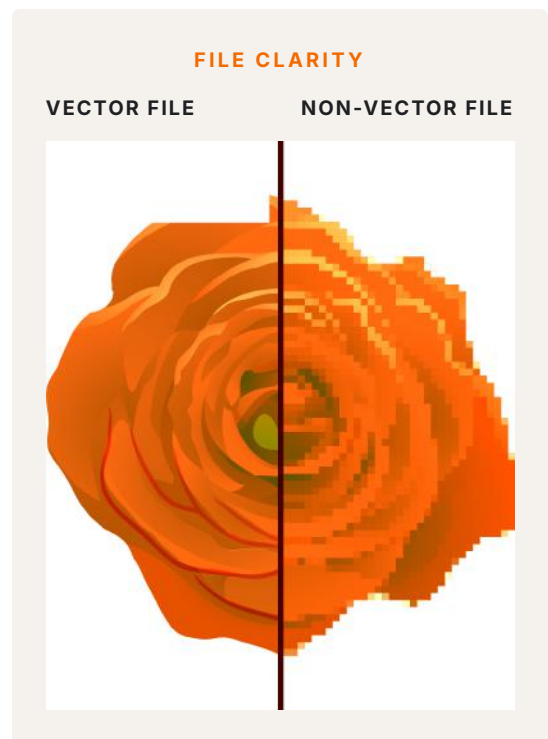

We enjoy working with our customers to make their orders look great! Below are some tips and guidelines to streamline the pre-production process. Don't have a graphics professional to help? Email sales@quietvalleyproducts.com or call our team at **844.350.4328**.

PREFERRED FORMATS & SIZE

Documents should be provided as an Adobe .PDF, .EPS or .AI file with **all** fonts outlined, images **embedded** and color output **CMYK**. All black text and vector imagery should be defaulted to 100% black to avoid color disparities. Renderings require a minimum of 150 dpi. All other graphics should be vector to ensure high-quality printing. We also accept packaged .INDD and .IDML files for print requests and inquiries.

SENDING US YOUR FILES

Files less than 10 MB in size can be sent via email to sales@quietvalleyproducts.com. For larger files, please email a downloadable link or reach out to us directly to arrange transmission.

■ PRE-FLIGHT CHECKLIST

- | | | | |
|---|--|--|---|
|  .PDF, .EPS or .AI file |  All fonts outlined |  Images embedded |  Color output CMYK |
|  Black set to 100% black |  Renderings 150 dpi minimum |  Other graphics in vector |  Packaged .INDD / .IDML accepted |

FREQUENTLY ASKED QUESTIONS

Q1

Can I print multiple logos or designs on one screen or vinyl banner?

Yes. Many screens and banners include multiple graphics, such as school and sponsor logos.

Q2

What file type is needed for custom printing?

Vector files are required for printing.

Q3

Do printed fence screens fade in sunlight?

Professional-grade inks are designed to resist fading, although extreme exposure may gradually reduce vibrancy over time.

Q4

How long does the print last?

With quality materials and UV-resistant inks, prints typically last several years depending on exposure.

3 YEAR WARRANTY

Warranty is subject to terms listed at www.quietvalleyproducts.com.
